

Optimize and Transform Your Network. Accelerate Your Business Results.

Maximize speed, performance,
and return on investment with
the support of expert
planning, advisory, and
managed services

INFINERA OPTIMIZE SERVICES

Your network needs to run like a well-oiled machine, delivering peak performance even as customer needs grow. Adapting your network for sustained performance doesn't have to be daunting, even with limited staff or resources. Even complex transformation, automation, or integration projects become easy with the right support. With Infinera by your side, you can manage it all with the expertise and rapid execution that's needed.

Infinera offers a comprehensive suite of services designed to help you optimize and transform your network, so you can sustain the performance your customers expect, even as their needs grow. Whether you're seeking to enter a new market, integrate multiple networks, or solve complex operational issues, you can turn to Infinera to provide the technical and business expertise you need, as well as the personalized service and commitment to your success you've always wanted.

"With Infinera we were in a safe pair of hands. The Infinera Experience was second to none – flexible, transparent, and approachable. The deployment was fully managed by Infinera from end to end; we just had to open the door! The equipment was turned up and tested within a day with preconfigured redundancy onsite. We experienced no issues with the services throughout the event. Infinera really did drive and deliver reliability for the live broadcast for this major event in Zurich."

—Claus Beck, Director, Production, MySports

ORCHESTRATED DISCOVERY AND MIGRATION SERVICES

Unleash the power of automated network discovery to jump-start your network optimization or transformation initiatives.

Network Audit and Discovery

The pace of technology and new service introduction can result in a mix of network management and operations support systems that makes it difficult to gain a complete picture of key network attributes. Infinera's Orchestrated Discovery service can transform cryptic information into an easy-to-understand visual representation by service and network layer.

Network Optimization and Planning

Infinera's Orchestrated Discovery service creates the perfect canvas to support future state planning to optimize

current networks by removing bottlenecks or weeding out underutilization. You can also plan future architecture and migration strategies to transform your network using the latest technology and solutions.

Network Migration

Infinera uses proven, reliable methods; software tools; and experienced teams to migrate traffic to modern, reliable networks. Infinera's expertise and disciplined approach avoids rework and downtime and expertly integrates new solution elements.

NETWORK CONSULTING

Transform your network or resolve complex network challenges with consultative strategic and tactical planning services that help you achieve peak operational and asset efficiency.

High-level and Low-level Design Services

Infinera consultants can work with you to develop a network architecture plan for achieving consistently high network performance. Design services provide the information you need for high-confidence deployment and efficient future network expansion.

High-touch Engineering Support

Dedicated technical support from one of our expert engineers, delivered onsite or remotely.

Software and Systems Integration

Customized expert support for planning and executing complex software and systems integration.

Managed Services

Rapidly establish new services or integrate networks with customized, end-to-end services that complement your team's current capabilities and minimize execution risk.

Specialized Support for Your Most Complex Projects

Infinera Services provide custom advisory, managed, professional, training, and support services to help you quickly optimize or transform your network. Whether you'd like to add optical expertise to your team or require more extensive support for a complex project, you can count on Infinera Services.

We can help you develop a deep understanding of your network's performance and a clear plan for meeting your goals. We can also support you with detailed planning and execution of complex network transformation projects. When you leverage the combined talents of your team and Infinera's optical specialists, you can

efficiently solve problems and generate faster results.

Infinera Services:

- Feature customizable services and support
- Offer expert planning and execution of complex projects
- Enable accelerated business results

Expertise Matched to Your Strategic Objectives

When you rely on Infinera Services to help you optimize or transform your network, you gain an experienced strategic ally. We apply our deep technical and business expertise to every project

SOFTWARE CONSULTING

Infinera consultants can assist with a variety of software automation projects, including SDN/NFV.

- SDN design
- SDN installation
- Northbound integration
 - From orchestrator to OSS, BSS
 - From controller to orchestrator
- Southbound integration
 - From domain-specific controller to orchestrator
 - From network elements to controller
- Portal customization
- Workflow and rule engine customization

that we undertake. Our customers will tell you that we go above and beyond to solve your most complex network challenges, and we don't stop until you get the results you need. That's because ensuring your success isn't just our job, it's our passion and our personal responsibility. Infinera Services offer:

- A partnership approach
- Business and technical expertise
- Unwavering commitment to your success

ENSURE SUCCESS WITH INFINERA SERVICES

When you choose Infinera Services, you gain a level of expertise rooted in decades of successful deployments. You get the global scale and proven expertise you require, enhanced by the speed, personal service, and peace of mind you've always wanted.

It's called the Infinera Services Experience. And for you, it means:

Personalized Services	Rapid Resolution	Unrivaled Support	Accelerated Time To Revenue	Peace of Mind

Network owners and operators worldwide rely on Infinera Services to deploy, operate, and optimize their critical network infrastructure. Shouldn't you, too?
