

## Insight Infinera 2015 Scheduled for October 6, 2015

**Sunnyvale, Calif. – Sept. 22, 2015** – Infinera, provider of [Intelligent Transport Networks](#), announced it will host an Online Briefing: Insight Infinera 2015. Infinera executives and leading network operators will share their insight on optical network transformation and the evolution of metro networks from 10G to 100G.

Highlights of the webcast include:

- Tom Fallon, CEO of Infinera, discussing Infinera’s business performance and strategy
- Dr. Dave Welch, co-founder and president of Infinera, addressing how Intelligent Transport Networks are transforming and enabling massive growth in traffic from cloud services
- Karl Thedéen, managing director of Infinera’s Metro Business Group, discussing the progress Infinera is making integrating the new metro portfolio
- Panel featuring executives from leading network operators discussing their challenges and network transformation imperatives

The event is scheduled to begin at 12:00 p.m. EDT (9:00 a.m. PDT) and will run until approximately 1:30 p.m. EDT (10:30 a.m. PDT).

Presentations will be webcast live and anyone can register to watch the event. The slides used during Insight Infinera 2015 will be available on the website at the time of the presentation. An archive of the webcast will also be available online beginning October 7, 2015.

### About Infinera

Infinera (NASDAQ: INFN) empowers network operators to quickly deliver differentiated services by enabling an infinite pool of intelligent bandwidth. With the recent completion of its offer for the shares of Transmode, Infinera now offers an end-to-end packet-optical portfolio to fully address the WDM networking market including long-haul, subsea, cloud and metro. Infinera leverages its unique large scale photonic integrated circuits to deliver innovative optical networking solutions for the most demanding network environments. Deployed across the globe, Infinera Intelligent Transport Networks enable carriers, cloud operators, governments and enterprises to accelerate service innovation and simplify optical network operations.
